

Greater Middletown Opioids Task Force

Resources in our Community

Prepared by
LeAnna Basque, Intern,
City of Middletown
Health Department,
in partnership with
members of the
Task Force Resource
Awareness Subcommittee

September 2023

Middletown, CT

Forward

The Greater Middletown Opioids Task Force is a collaborative effort between organizations who are concerned about unhealthy opioid use and overdose rates in the Greater Middletown community. We recognize that unhealthy substance use has many causes and can be dependent on health, pain, past experience, trauma, social needs and more. Our Task Force hopes to bring organizations and community members into thoughtful discussion and action about opioid use.

The mission of the Greater Middletown Opioids Task Force is **to engage the Greater Middletown community in working together to promote opioid awareness, education, harm reduction, and access to treatment thereby reducing opioid-related overdoses and deaths and building a healthy, safe, and drug-free community.** We hope to achieve our vision of **a community working together to prevent opioid use and to help people experiencing opioid use challenges.**

This document has been prepared by the Greater Middletown Opioids Task Force Resource Awareness Subcommittee which aims to **facilitate awareness of prevention and treatment resources for substance use in the Greater Middletown community in order to increase access to services.** The purpose of this document is to increase awareness of resources available for Greater Middletown community members, decrease barriers to information and allow for referrals between organizations.

For more information on the Greater Middletown Opioids Task Force, please visit our [webpage](#).

Many thanks to our Task Force Members for their continued dedication and involvement.

Please note that efforts have been made to create a thorough resource guide for community members and agencies. We recommend that you check with organizations directly about their services.
